**DETAILED ACTION**

***Specification***

The disclosure is objected to because of the following informalities: On page 12, line 8 applicant refers to "main flame" when text should read "main frame."

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, "track-type" is indefinite. The examiner suggests reciting "tracked" instead. In claim 2, the phrase "a first arm portion and a second arm portion that are provided *in left and right pairs*" in lines 3-4 is not consistent with the description set forth in the applicant's specification, since neither the figures nor description of the invention discuss left and right pairs of arm portions. Corrections are required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 1,429,449 to Norelius. Norelius discloses a main frame and suspension for tractors comprising an equalizer bar of a tracked vehicle having:

- two ends supported by left and right track frames 26
- an equalizer bar main body 24 formed of a bar member having a spring function (claim 1.)

#### ***Allowable Subject Matter***

Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. 2,631,844 to Paton discloses a torsion bar with a spring function and free ends fixed in opposite directions. The main body and free ends are pivotally mounted.

U.S. 3,037,789 to Allison discloses a torsion bar with a spring function and free ends fixed in opposite directions.
